# Foreword

The 2023 Industrial Data Book represents our commitment to supporting industrialists as they face current economic challenges and strive for sustainable development through improved decision-making. This data book primarily concentrates on the statistical factors that impact economic growth, particularly focusing on export expansion.

The statistical analyses presented in this data book are based on comprehensive statistical data sourced from various institutions, including the Department of Census and Statistics (DCS), the Department of Customs (DoC), the Export Development Board (EDB) and the Central Bank of Sri Lanka (CBSL).

Within this publication, you will find statistical references related to both exports and imports. This includes tables featuring productivity indicators derived from manufacturing establishments and the number of individuals employed in each sector, as well as statistics on key indicators of industrial activity spanning from 2016 to 2020. The data also covers the value of outputs and output components, intermediate consumption values, employment breakdowns by nature, economic indicators categorized by industry class, and import and export statistics.

I extend my gratitude to Mr. Aruna Bandara, Director General of the Planning Division at the Ministry of Industries, and his dedicated team for their unwavering support throughout this project. I would also like to express my sincere appreciation to Mr. Kavishka Heshan, Statistician at the Ministry of Industries, and his team members, Mr. Nirosch Chathuranga Pathiraja and Mr. Shamith Rashmika Jayawardane, for their remarkable dedication and collaborative efforts with the DCS, which helped make this data book a reality.

I firmly believe that the 2023 Industrial Data Book will play a crucial role in shedding light on current and future productivity and economic growth trends within the industrial sectors. It has the potential to significantly influence policymaking in the industry sectors and will be valuable to a wide range of data consumers, including policymakers, economic planners, academics, researchers and other interested parties in the future.

**J.M. Thilaka Jayasundara**

# Overview

As of 2022, the paper industry in Sri Lanka has been experiencing growth and facing challenges typical of the global paper market.

**Market Size and Demand:** The paper industry in Sri Lanka is moderately sized, catering to both domestic demand and export markets. The demand for paper products in Sri Lanka is primarily driven by various sectors including education, packaging, printing, and publishing.

**Production Capacity:** Sri Lanka has several paper mills that produce a variety of paper products including printing paper, packaging paper, tissue paper, and board. However, the production capacity may not be sufficient to meet the growing demand, leading to imports to bridge the gap.

**Raw Material Supply:** The paper industry in Sri Lanka heavily relies on imported raw materials such as pulp and waste paper due to limited domestic resources. Fluctuations in global pulp prices can impact the production costs and profitability of paper manufacturers in the country.

**Environmental Concerns:** Like in many other countries, the paper industry in Sri Lanka faces scrutiny over its environmental impact, particularly regarding deforestation for wood pulp production and waste management. Efforts to adopt sustainable practices and promote recycling are gaining traction to address these concerns.

**Technology and Innovation:** To remain competitive, paper manufacturers in Sri Lanka are investing in technology and innovation to improve production efficiency, product quality, and environmental sustainability. This includes the adoption of advanced machinery, automation, and eco-friendly processes.

**Government Regulations and Policies:** The Sri Lankan government implements policies and regulations to support the growth of the paper industry while ensuring environmental protection and sustainability. Tax incentives, subsidies for eco-friendly practices, and waste management regulations are some measures aimed at balancing industry growth with environmental conservation.

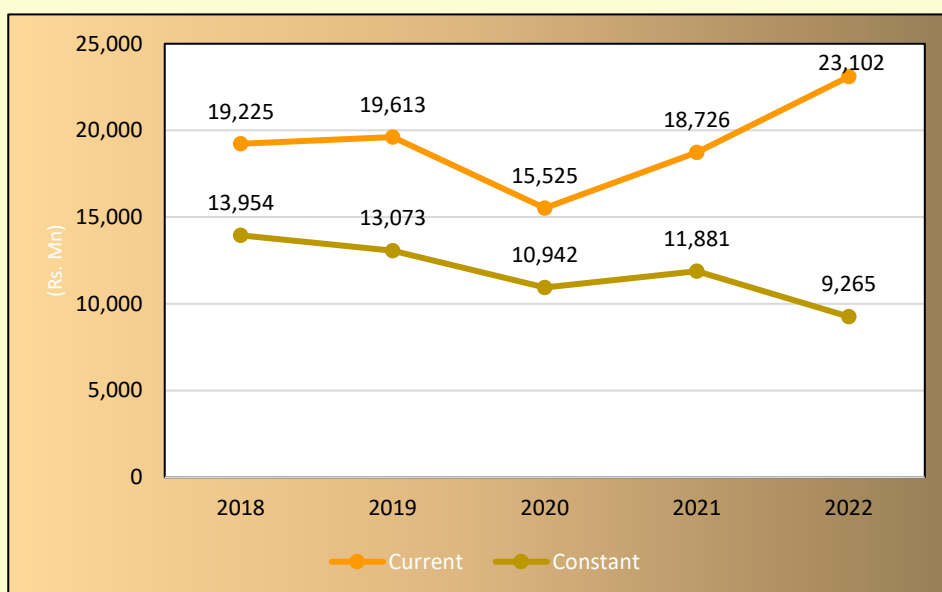

**Export Market:** Sri Lanka exports a portion of its paper products to regional markets such as India and countries in the Middle East and Africa. Export opportunities provide an avenue for revenue growth and market expansion for local paper manufacturers.

Overall, the paper industry in Sri Lanka in 2022 is characterized by steady growth, technological advancements, environmental challenges, and efforts towards sustainability and market diversification. Continued investment in innovation and sustainability is essential for the long-term viability and competitiveness of the industry.

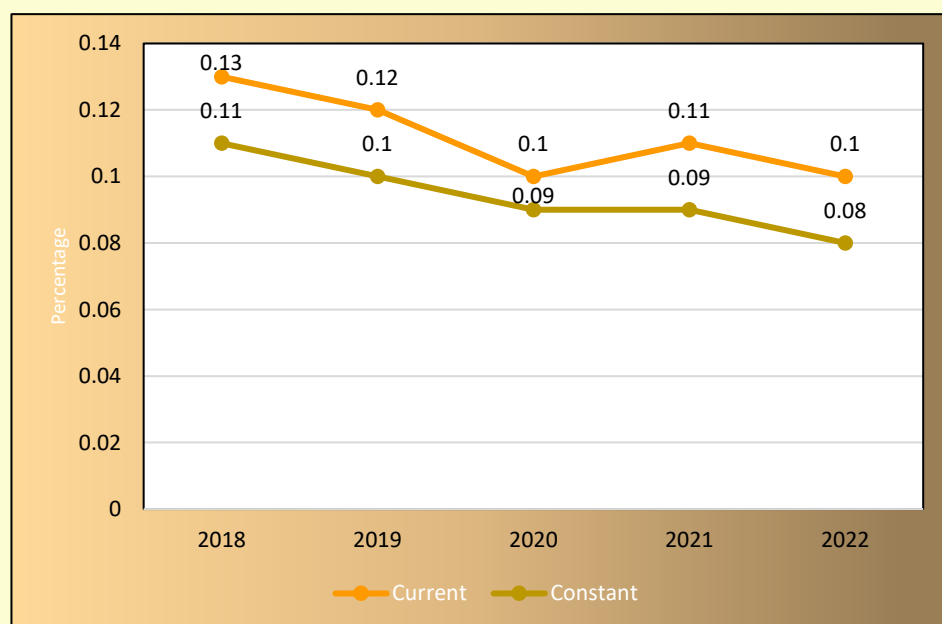

**Table 1: Paper Product Sector Contributions to the GDP at Current and Constant Market Price (2018 - 2022)**  
(Based on Updated base year 2015)

Year	Current		Constant	
	Contribution Value (Rs. Mn)	Share of total Current GDP (%)	Contribution Value (Rs. Mn)	Share of total Constant GDP (%)
2018	19,225	0.13	13,954	0.11
2019	19,613	0.12	13,073	0.10
2020	15,525	0.10	10,942	0.09
